ABOUT ME

I am a motivated and detail-oriented Computer Engineering student with practical experience in both software development and software testing. I have a strong foundation in programming, web technologies, and quality assurance practices, with hands-on exposure to building real-world applications and testing production platforms. My experience includes manual testing, test case design, bug reporting, and regression testing, along with developing full-stack and machine learning–enabled applications. I am also proficient in Python, Java, SQL, and web technologies, and have working knowledge of automation and API testing using Selenium WebDriver and Postman. I am comfortable collaborating with cross-functional teams using tools like Jira and Git, and I enjoy contributing across the software lifecycle—from development to validation—to deliver reliable and scalable solutions.

EXPERIENCE

QA Manual Tester | Eklavya.me — September 2025-Present

- Participated in testing of the Eklavya.me platform, identifying bugs and UI/UX issues.
- Tested new features and workflows to ensure functionality and usability.
- Provided detailed feedback to the development team for improvements.
- Collaborated with developers to retest fixes and validate updates.

Software Quality Assurance Tester | PRAM Educate IT Software LLP — May 2025 – July 2025

- Conducted manual testing on Android mobile application, identifying key bugs and UI issues.
- Designed and executed test cases for various modules to ensure functionality and usability.
- Used tools like Postman for API testing and Selenium for web automation practice.
- Collaborated with the development team to report and retest resolved issues.

EDUCATION

PIMPRI CHINCHWAD COLLEGE OF ENGINEERING AND RESEARCH — 2023-PRESENT

- Bachelor of Computer Engineering
- Current CGPA: - 8.86

S.B PATIL COLLEGE OF SCIENCE AND COMMERCE — 2021-2023

- Completed Higher Secondary Certificate (HSC)
- Specialization: -Computer Science

St Jude High School — 2008-2017

- Completed Secondary School Certificate
- Secured: - 76%

SKILLS

Languages: Python, Java, C/C++, SQL, PHP, Selenium, Manual Testing, Dataset Testing, Automation Testing

Web Development: HTML, CSS, ReactJS, *JavaScript.*

Technologies & Tools: MySQL, Selenium WebDriver, Fast API, Streamlit, Scikit-learn, Maven, JUnit, Postman, Git, GitHub, Jira

Machine Learning & NLP: Pandas, NumPy, Text Classification, Model Deployment (using Fast API).

PROJECT

REAL-TIME CHATROOM WITH HATE SPEECH FILTERING

- A PHP-based chatroom app that blocks hate speech using an ML model. Offensive messages are flagged, while normal messages are stored in the database.
- Technologies Used: PHP, MySQL, JavaScript, Fast API (API integration), cURL, HTML, CSS

PAYROLL MANAGEMENT SYSTEM

- Developed a web-based payroll management system to automate salary calculation, attendance tracking, and employee data management.
- Technology Used: - HTML, CSS, PHP, MySQL

PORTFOLIO WEBSITE

- Personal portfolio showcasing projects, skills, and achievements; includes interactive UI and project demos.
- Technologies Used: React + TypeScript

ACHIEVEMENT

- Awarded Gold Medal at the State Level Karate Championship.
- Represented district in the Inter-District Hockey Tournament as a Captain.
- Won Best Project Award at PCCOER College for outstanding project development and Innovation.
- Appointed as Technical Member in Google Developer Student Clubs (GDSC) & PIC (Project and Innovation Club)

VOLUNTEERING

- Volunteered at the Global Entrepreneur Conclave 2025 – National Level Event, assisting with event coordination, technical support
- Acted as a Technical Member for ACM, assisting with technical setup, supporting workshops, and ensuring smooth execution of event operations.
- Served as a Technical Member in Navdhara – State Level Project Competition, where I managed the official event website, ensured smooth online operations.
